MERIDIAN FACILITY SOLUTIONS

Capability Statement · Fairfield, California

Company overview

Meridian Facility Solutions is a Fairfield, California company that plans, manages, and inspects janitorial and facility services for public-sector facilities, public buildings, and commercial properties. Our approach is one point of accountability for your facility services: facility managers deal with one company instead of many. We confirm what the site needs, schedule the work, and check it against the written requirements. Services are delivered by trained crews and vetted partners under our management and quality control. We begin operations in January 2027.

Services

LAUNCH SERVICE

Janitorial & Custodial

Recurring cleaning for offices, public buildings, restrooms, break rooms, and common areas, built around your written scope and schedule.

COMING SOON

Facilities Maintenance

Routine upkeep and minor repairs through our vetted partner network.

COMING SOON

Groundskeeping & Landscaping

Mowing, trimming, litter pickup, and seasonal care for building grounds.

COMING SOON

HVAC & Building Systems

Filter changes and scheduled maintenance coordinated with licensed partners.

How we work

Scope. We review the statement of work and confirm tasks, frequencies, hours, and access rules in writing. **Assign.** We staff each task with trained crews or vetted partners and set the schedule, supplies, and site contacts. **Quality control.** We inspect against the scope, track issues to closure, and report back, so you have one contact for every question.

Service area

Solano County and Northern California, and beyond.

Leadership

Simeon Meehan, Founder. Simeon brings over a decade of hands-on experience in facility operations and commercial services across the Bay Area. He's managed teams, budgets, and vendor relationships for properties ranging from small offices to large commercial campuses, and he's seen firsthand how the right facilities partner can transform a business. At Meridian, he leads with the belief that reliability isn't a nice-to-have, it's the whole job.
